Sure to Fruit Bittersweet

SURE TO FRUIT BITTERSWEET

2-105—(Celastrus Orbiculatus). Oriental Bittersweet. The most prolific fruiting variety known. The ordinary Bittersweet often fails to fruit. In this variety we offer you a Bittersweet that always fruits. Even one vine if planted alone will fruit, but we recommend that you plant two close together and take advantage of the resulting cross pollination. It's worth it. This rare species was imported from Central and Western China. The leaves are a glaucous green and somewhat larger than those of the common Bittersweet. It grows rapidly in any kind of soil, in sun or partial shade. In autumn yellow and orange-scarlet berries cover the vine all over instead of an occasional small cluster as in the common kind. Excellent for late fall and winter bouquets. **Strong vines, \$1.15 each; 2 for \$1.95.**

Price: \$1.25 each; 2 for \$2.35.

PASSION FLOWER

(*Passiflora Caerulea*). A fascinating flower, so beautiful it seems unreal! An intricate arrangement of floral parts giving it religious significance. According to ancient legend the stamens represent 5 wounds suffered by the Savior; the 3 pistils, nails in His hands and crossed feet; the filaments, crown of thorns; and petals 10 apostles at the crucifixion. Bushy, vine-like plants bloom throughout the summer and fall, attain height of 10-20 ft. on trellis in summer; can be potted for overwintering indoors. Not hardy outdoors in north. Unusual Climbing Vines

CLIMBING HYDRANGEA

(*Hydrangea Petiolaris*). The Choicest of All Climbing Vines. Par excellence for growing on shady walls. It is woody but clings to brick or wooden walls without support, and also does fine on old trees or stumps. Its foliage is bold, clean and shrub-like, and a rich dark green color. Short spur branches projecting from the wall are topped with white, fragrant, Hydrangea-like blooms throughout the summer. The effect created is most artistic as well as amazing. Does equally well in shade or sun. In fact, we recommend the Climbing Hydrangea for north, west walls or such places where shade is dense in summer. The height can be easily controlled from 10 to 20 feet as desired. If you own one of these vines, you will have something you will admire all of your life. Strong plants, \$3.00 each; 2 for \$5.75.

A Living Farm Fence

ROSA MULTIFLORA

HARDY — STOCKPROOF — ATTRACTIVE

The Miracle Rose Hedge

2-79 — An all-purpose hedge for your lawn, for windbreaks, to hide that unsightly view, or for stock-tight fences. Is very hardy. Blooms late in the Spring . . . usually white flowers, but now and then a bush will be covered with bright pink bloom. A medium-fast grower — on soil of average fertility, it will produce a hedge in three or four years that will turn any kind of livestock except small pigs. The attractive plants grow 6 to 8 ft. tall and 5 to 7 ft. wide. Rosa multiflora hedges do not need clipping, pruning, training or supports, although for lawn hedges it can be kept pruned to any height or size. Thrives under a wide range of soil types and conditions.

You will find the Multiflora hedging a natural for conservation farming . . . it's stock-proof, hardy and well-behaved. Recognized and developed by U.S. Soil Conservation Service. Trial fences have been planted in the East, South, Middlewest and Northwest and proven successful. You can have a cheap, stock-tight fence for 40% less cost of woven wire fence by planting Multiflora, and at the same time kiss your fence-maintenance problems goodbye. Note photograph at upper right hand corner, which will give you some idea as to the adaptability of this unique hedge. Should you want to remove this hedge, it is quickly destroyed with 2-4-D or by clipping.

HYBRID BUSH CHERRIES

Make an Ideal Bush or Hedge that Bears Delicious Fruit

Now we are in a position to supply a Hybrid Bush Cherry which will provide Cherries for those of you who are out of the regular Cherry country — plant these hybrid bush cherries and enjoy the fruit just as much as you would regular cherries. Cherries produced in these bushes are much larger and tastier than those produced by the old Hansen Bush Cherries and are better growers. These are budded on American plums, and should be hardy anywhere. Should a wild plum stalk with large, dull leaves come shooting up through the shiny leaf Bush Cherry, be sure and trim it out. Not only do they produce delicious Cherries, but they provide an ideal hedge or screen. Foliage on these hybrid bushes is so heavy, it hides the fruit from the birds. **We are offering six varieties in this wonderful Hybrid Bush Cherry.** Be sure and specify the variety you wish.

Latham

BLACK RASPBERRIES

BRISTOL: Almost Seedless

1-15 — This variety compares very favorably with the New Morrison, and in some localities has proven far superior. Bears heavy crops of large, glossy-black berries; seeds are so small as to make them appear seedless. Ripens about five to six days after Cumberland. It is strongly resistant to the usual raspberry diseases. A strong, vigorous grower. This is a top quality blackcap that is widely adapted in all raspberry sections . . . a variety we unhesitatingly recommend to all commercial growers. The bushes are very hardy.

PRICES: 1-Yr. No. 1 plants, 6 for \$1.60; 12 for \$2.35; 25 for \$3.75; 50 for \$5.95; 100 for \$10.35; 250 for \$22.95; 500 for \$38.50; 1,000 for \$72.00. See price Bearing-Age Transplants bottom of page.

JUNE-BEARING STRAWBERRIES

Robinson

30 Berries Will Fill a Quart

Still one of the best medium to late — 10 days to 2 weeks later than Premier. The largest berry we have ever seen — 30 berries will fill a quart. Berries are extremely large, and honey-sweet. Color is decidedly a cardinal-red. Berries have a firm, tough skin, making it an excellent shipper to distant markets. An excellent plant maker on most any kind of soil. Premier and Robinson, still the two leading varieties, will give you berries over the entire season.

Price: 25 for \$1.15; 50 for \$1.95; 100 for \$2.75; 250 for \$4.95; 500 for \$7.95; 1,000 for \$13.50; 2,000 for \$25.00.

Premier

Still The Leading Early Berry

A standard of excellence with all growers. A great money maker, for it yields its fruit crop at a time when strawberries are in great demand and sell at fancy prices. Premier is as nearly frostproof as any strawberry can be. It is unusually healthy, being free from leaf-spot and other diseases. Its deep heavy roots enable it to withstand dry weather and mature a full crop of big berries when many varieties are a complete failure. Large, bright red, firm berries of fine texture and flavor.

Price: 25 for \$1.45; 50 for \$2.60; 100 for \$3.85; 250 for \$7.50; 500 for \$9.95; 1,000 for \$16.50; 2,000 for \$30.00.

BEST LATE

EARLIDAWN

This variety originated as a seedling from the cross of Midland x Tennessee Shipper. The earliest of all to ripen — about 5 days before Blakemore. A nearly FROST-PROOF variety — its flower stems are short and the flowers are well covered by leaves to protect them from frost.

Berries are average large in size; are fairly uniform in shape; the color is a strong vivid red, a little deeper than Blakemore, and glossy. Berries have a tough skin-firmer than Sparkle. Flavor is tart and good. Excellent for freezing.

Plants are vigorous, very productive; make an excellent fruiting row. As Earlidawn has already produced 25% of its crop by the time Blakemore starts ripening, it will command highest market prices. EARLY RIPENING plus HEAVY PRODUCTION means EARLIER and LARGER PROFITS for the grower.

Price: 25 for \$1.95; 50 for \$3.50; 100 for \$5.25; 250 for \$9.25; 500 for \$13.50; 1,000 for \$19.95.

New RED GLOW

A cross of Fairland and Tennessee Shipper. Ripens quite early, usually with Premier. Berries are large average size throughout the picking season; they are glossy, vivid-red color, with outstanding Strawberry flavor. Make an excellent freezing berry for they are red throughout. A good producer... yields of 410 (24 qt.) crates per acre have been reported. Red stele resistant. Produce a good fruiting row. Good commercial variety.

Price: 25 for \$1.95; 50 for \$3.50; 100 for \$5.25; 250 for \$9.25; 500 for \$14.50; 1,000 for \$25.00.

BURGUNDY RASPBERRY

(Plant Pat. 1567.) New, and finest purple raspberry to date. A chance seedling discovered in western New York. During six years of testing, it showed itself far superior to all other purple raspberries. It is extremely vigorous and resistant to disease, hardier, and yields more. Burgundy has a strong, upright growth. Fruit is large and sweet, firm, attractive. When canned, retains its fine flavor and remains firm. We believe Burgundy is destined to be the most popular of all purple raspberries.
